PROFESSIONAL SUMMARY

- Award-winning data journalist with 10+ years of data analyses experience transforming complex proprietary and public datasets into policy-influencing stories, custom visualizations, and impactful narratives.
- Skilled in building data products and tools, conducting deep research, and crafting clear, accessible stories that inform strategy, shape public discourse, and influence policy. Recognized for work cited by legislators, academics, policy organizations, and advocacy groups.
- Pulitzer finalist, Loeb honoree, and Overseas Press Club award winner.
- Proficient in Python, SQL, Bloomberg Terminal, Looker, Tableau and building editorial products from complex data. Proven leader in cross-functional collaborations, fast-paced editorial environments, and high-impact storytelling.

CORE SKILLS AND TOOLS

Reporting and research • Data Scraping and analysis • Polling and survey design • SQL • Python (Pandas) • Bloomberg terminal • Data visualization (Javascript, Tableau, Datawrapper, QGIS, Looker) • Editorial strategy

PROFESSIONAL EXPERIENCE

Jerry | Data Storytelling Lead | Mar 2025 – Present

- Spearheaded the [Auto Insurance Premium Index](#) and built editorial tools like the [Car Tariff Price Estimator](#), translating proprietary and public datasets into accessible products used by everyday drivers.
- Designed and programmed consumer surveys to analyze behavioral trends, transforming raw responses into insights on automotive markets, insurance affordability, and consumer decision-making.

Bloomberg News | Senior Data Reporter | Oct 2021 – Feb 2025

- Uncovered and analyzed opaque land and water ownership records in California and Australia to expose corporate water grabs. Work cited by the California Senate and the Australian Parliament (Pulitzer finalist '24, multiple SABEW awards winner).
- Tracked capital flows from global development banks to microfinance institutions via a custom database built from scraped disclosures (Loeb finalist '23).
- Uncovered corporate profiteering in global carbon credit markets (OPC award '23).

- Analyzed millions of immigration court records to reveal patterns in how individual judges decided asylum cases, exposing disparities in approval rates for people held in detention centers (New York Press Club award '25).

Mother Jones | Data & Interactives Editor | Sept 2019 – Sept 2021

- Directed data-driven storytelling and built newsroom-wide data infrastructure.
- Led and partnered on investigations into immigration policy, school segregation, and housing markets. Series on H-1B policies won a national award from the Asian American Journalists Association.

Reveal from The Center for Investigative Reporting | Google Fellow & Data Reporter | Jun 2015 – Sept 2019

- Produced award-winning data stories for web and radio, including the Silicon Valley diversity series. Series cited by more than 30 academics.
- Partnered with the San Francisco Museum of Modern Art on public data art projects.
